

TAKE THIS SHORT SURVEY

TO HELP US PROTECT YOUR DRINKING WATER

Pagosa Area Water requests your help in completing this important survey to document the material of your water service line from the water meter to just outside of your house or business. The results may help to improve the quality of water that you rely on every day. Submitting can assist PAWSD in determining the type of service line material used from the water meter to your home. The State Health Department is requiring all municipalities in the state to verify the pipe materials used on the customer and PAWSD side of the water meter. Without a completed survey, PAWSD may be required by the state to excavate your service line from the meter pit on the customer's side to verify the material used.

This survey may be completed through one of the following methods:

MAIL: Back of this postcard

PHONE: (800) 674-7961

If you have questions regarding this survey

Pagosa Area Water requests your assistance in completing this survey. At your convenience, please answer all questions and detach the survey along the perforated edge. Once completed, simply place the detached survey in your mailbox or drop it off in your nearest postal drop box.

Complete. Tear. Mail.

Account ID:
Location ID:

My house or business was built in one of the following time periods:
 Prior to 1960
 After 1988
 1960 to 1988
 I am unsure

I have determined my service line material as follows:
 I have observed the material and know what it is.
 I have been provided some form of documentation of the water service line material.
 It is my best guess.
 Other _____

My water service line—from the water meter to just outside of my home or business—is best described as one of the following:
 Lead
 Galvanized steel
 Copper
 Plastic
 I am unsure and would like someone from PAWSD to assist me in identifying the material.
 Other: _____

My home or business—is best described as one of the following:

NAME _____
ADDRESS _____
CITY, STATE, ZIP _____
